Review Script: Naman

Original Emirates website vs. Ayush's redesigned prototype. Read aloud in about 1 minute.

Hi, I am Naman, reviewing Ayush's website. I travel often, so I checked how fast I can book and check in. On the original Emirates site, booking took many clicks and I had to look around for check-in. On Ayush's design, Check-in is a clear button and the booking steps are short: search, select, confirm. Help is also easy to find, which I really like. One bad point is that the new design has fewer details on the flight cards, like baggage info, and a few buttons didn't do anything. Still, it felt faster. The original feels more complete, but Ayush's design is easier to use.
