Review Script: Jinali

Original Emirates website vs. Ayush's redesigned prototype. Read aloud in about 1 minute.

Hi, I am Jinali, reviewing Ayush's website. I looked at both the original Emirates site and his new design. On the original site, I saw many menus, offers and banners at once, so I wasn't sure where to start. On Ayush's design, the search box is right at the top and I understood it in seconds. The words are simple, like Manage, Check-in and Help, and Help is easy to find. Good thing: it felt calm, clean and fast. Bad thing: the original gives more offers and flight details, and the new one shows fewer. Also, a few buttons didn't do anything. Overall, I liked Ayush's design more for booking a flight.
