Review Script: Tanisha

Original Emirates website vs. Ayush's redesigned prototype. Read aloud in about 1 minute.

Hi, I am Tanisha, reviewing Ayush's website. I opened both sites on my phone. The original Emirates site felt crowded, and the text and buttons were small, so I tapped the wrong thing once. On Ayush's design, the buttons are big and there is a bottom menu, so I could use it with one thumb. The search box is simple and easy to find, and Help is always close. A bad point is that some buttons didn't do anything when I tapped them, and a few small texts could be bigger. Overall, Ayush's design is better for phones.
