Assignment - 1

UIUX

Aim - To compare the usability of MakeMyTrip, cleartrip, skyscanner, and IRCTC, and to apply the findings to the emirates flight booking website.

Theory -

website usability analysis evaluates websites on learnability, consistency navigation, visual hierarchy, accessibility, responsiveness. and trust. MakeMyTrip, cleartrip, sky scanner, & IRCTC. were compared on ease of use, flight search, info. presentation. etc.

conclusion.

The analysis compare the usability of diff. tourism & flight booking website's. A simple interface, clear navigation, trasparent pricing, & an easy booking process impove user satisfaction & the same points guide the Emirates website design.

FOR EDUCATIONAL USE

Assignment - 02 UI/UX

Aim- To understand user needs by creating user personas, and to design an Emirates flight booking website that makes travel planning booking simple & convenient.

Theory - The emirates website design is based on user needs. Personas show each groups goals & difficulties. The design simplifies flight search, price comparison, travel info., navigation, & booking, and gives destination recommendations.

Conclusion -
The analysis identify travellers needs and challenges. simple navigation, clear pricing, & an easy booking process improve user satisfaction & make Emirates trip planning convenient.

Assignment -03 UIUX

AIM - To design a user friendly website interface for Emirates that allows users to explore tourist destination, search & compare flights & book tickets conveniently.

THEORY -

Users can explore popular Emirates destination such as Dubai, London & new york, compare flight options by price, duration, & cabin class, select travel date, choose suitable flights, & view booking details.

Conclusion:

The emirates tourism & flights booking website was designed to make travel planning simple & convenient. It allows user to explore destinations, search for flights, book tickets, & manage travel details through an organized interface. Clear navigation & easy to use features help improve the overall user experience.

FOR EDUCATIONAL USE

Assignment 4. 4.4.4x

Aim - To design a user friendly website interface for Emirates that lets users explore tourist destinations, search flights, & book tickets conveniently.

Theory -
The Emirates website helps users plan trips by providing destination search, flight booking, hotel reservations, & travel recommendations. Users can explore popular destinations such as Dubai, London, & New York, compare flights by price & timing, select travel dates & cabin class.

Conclusion -
The Emirates website design simplifies travel planning by combining destination Exploration, flight booking, & travel services in one place. Its clear layout & easy navigation help users plan trips, book flights, & manage booking efficiently, giving a smooth & consistent experience on desktop & mobile screens.

FOR EDUCATIONAL USE

Assignment -05

UIUX

Aim- To evaluate the Emirates flight-booking website design in figma using usability heuristics, & to identify interface problems & possible improvements.

Theory-

Heuristic evaluation is a usability testing method used to find interface problems based on established usability principle. The emirates website prototype designed in figma is evaluated on user control, simplicity, consistency, navigation accuracy, responsiveness, and user support. Each parameter is given a severity score from 0 to 5, & improvements are suggested to enhance the flight booking experience.

Conclusion.-

The heuristic evaluation of the emirate figma-designed flight booking website helps identify usability issues & suyest improvements in navigation, flight comparisons information clarity, & booking convience.

FOR EDUCATIONAL USE

Assignment - 06 UIUX

AIM-
To study usability testing of the emirates tourism And flight booking website prototype created in figma using Maze.

Theory-
Maze is a remote usability testing tool used to evaluate the Emirates figma prototype. It helps analyse how users navigate the website, search for flights, compare fares, & explore travel options. Metrics such as task completion rate, misclicks, heatmaps, & task duration helps identify usability issues & improve the overall user experience.

Conclusion.
Thus usability testing of the Emirates website prototype using maze was studied to understand user behaviour, identify navigation issues, & improve the websites usability & user experience.

FOR EDUCATIONAL USE

Assignment - 07 UIUX

Aim - To redesign the interface of the project developed in the previous lab assignment for users with special needs, and to create an accessible & inclusive interactive prototype.

Problem statement.

In previous assignment you design an appl. for the general population & created its wireframes, screens & prototype in figma. In this assignment, use the same proje & the same figma file & redesign it for a group of users with special needs.

FAQ's

Explain the four principal of WCAG with suitable example.

(1) Perceivable : users can see or hear the content. Ex : alt text on seat map images, captions on videos, strong text contrast.

(2) Operable : users can use every control. Ex 44x44 px buttons, key boards & voice support.

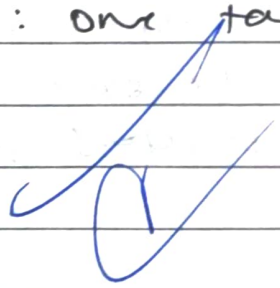

(3) Understandable : content is clear & predictable. Ex simple words.

(4) Robust : works with different devices & assistive tools.

FOR EDUCATIONAL USE

Q2. Design consideration 2 my Emirates app

→ - visual: screen reader labels, text of 16 px or more, 4.5:1 contrast, no color only meaning.
- Hearing: captions, & delay or gate alerts on screen banners plus vibration.
- Motor: large 44×44 px buttons with spacing, no swipe only actions, main buttons within thumb reach,
- Cognitive: one task per screen simple steps.
